

An aerial photograph of a wind turbine in a vast, green agricultural field. The turbine's tower is white with a red band and a green base. At its base, a construction site is visible with several yellow trucks, a white van, and various pieces of equipment. The long shadow of the turbine's blades stretches across the field towards the right. The text 'INTERIM REPORT' is in the top left, and 'First half-year 2025' is in the center. The European Energy logo is in the bottom right.

INTERIM REPORT

First half-year 2025

EUROPEAN
ENERGY

EBITDA

EURm

EBITDA reached EUR 92.7m, reflecting an increase of EUR 95.1m compared to the previous year, primarily resulting from the sale of energy parks.

Divested capacity

+1,252 MW

In H1 2025, we divested a total of 1,252 MW of renewable energy capacity, which is a significantly more than in H1 2024 (41 MW). In May 2025, we divested 83 MW of operating wind farms in Poland.

Under construction

MW

+41%

Our renewable energy capacity construction increased by 41% at the end of H1 2025 compared to the same period the year before. In H1 2025, a total of 1,380 MW of solar farms were under construction across both Europe and Australia.

Power producing assets

MW

+15%

Renewable energy production capacity increased by 15% primarily driven by an increase in the capacity of solar power reflecting the grid connection of several solar farms in ultimo 2024 in both Europe and Australia.

Avoided CO₂

Tonnes of CO₂eq

255,176 tonnes of CO₂eq

Solar

61,783

Wind

193,393

We avoided an estimated 255,176 tonnes of CO₂eq GHG emissions through the 1,063 GWh renewable electricity we produced in H1 2025, which is **4% more** than in H1 2024.
